Effective 1/1/16

SB 1985 by Uresti

Appraisal

Section 23.175: Replaces the projected price of imported low-sulfur light crude oil with the projected spot price of West Texas Intermediate crude oil as the benchmark used by a chief appraiser when calculating the price adjustment factor for oil for the purposes of a requirement that a method of appraising a real property interest in oil and gas in place take into account the future income from the sale of oil or gas at which the oil or gas produced from the interest is projected to be sold in the current calendar year. Specifies that the projected spot price of West Texas Intermediate crude oil and the projected spot price of natural gas at the Henry Hub price adjustment factor benchmarks be expressed in nominal dollars per barrel or per million British thermal units, as applicable. Replaces the most recently published Early Release Overview of the Annual Energy Outlook with the most recently published edition of the Annual Energy Outlook as the source for such spot price projections for the current calendar year.

Effective 1/1/16

SJR 1 Author: Nelson

Proposing a constitutional amendment providing for an exemption raising homestead exemption from \$15,000 to \$25,000.
